T68 SPECTRA

The T68 SPECTRA versatile GPS tracking device is our most versatile pet/personal/car GPS tracking device.

This incredible GPS/GSM-PCS/GPRS tracking device is actually suitable for a number of different tasks as follows:

- large and medium size pet and animal tracking ("extra" version only)
- children and elder people tracking and monitoring
- GPS tracking and monitoring for outdoor/sports/leisure activities
- GPS tracking and monitoring for water sports and activities ("extra" version only)
- truck/car/bike/scooter tracking device
- truck/car/bike/scooter satellite alarm.

Thanks to the relevant number of innovative features, along with the opportunity to choose from two different versions available, the SPECTRA T68 GPS tracker is definitely your best possible buy for a GPS tracking device, coming available at a very cheap price.

Featuring full SMS remote-controlled operation and programming, fast and easy-to-use PC configuration software, clear and intuitive configuration menu and SMS commands, the daily use of a SPECTRA T68 GPS tracking device will certainly turn out to be an extremely pleasant and enjoyable experience.

Please check out the remarkable number of *truly innovative* features this little wonder makes available to you (to allow a clearer comparison, we have highlighted all of the most relevant innovations of our product in comparison to the current standard of other tracking devices currently available on the market):

1. extremely user-friendly and intuitive use, no need for complicated operation or specific knowledge to use the device
2. double configuration mode (SMS commands or PC configuration software) available
3. multiple user tracking feature
4. 100% Google Earth/Maps tracking compatibility
5. *super-savvy tracking mode* (available soon): by enabling a dedicated configuration switch, SMS polling will be possible by simply ringing the GPS tracker SIM card phone number (requires active caller ID service from cellphone carriers)
6. SOS tracking features with dedicated pushbutton for activation and SOS warning message with GPS coordinates
7. easy to set and *remote-controlled geofence alarm feature*
8. speed alarm feature
9. *anti-GPS jamming alarm feature*: this is one of the most remarkable features when the SPECTRA T88 tracker is used as a vehicle tracking device or satellite car alarm. As soon as the GPS signal is lost or jammed, a special alarm will be sent out to pre-defined phone numbers, along with the latest available GPS position detected
10. programmable continuous GPS tracking
11. highest *security against theft and unauthorized use*: the opportunity of inserting a six-figure password and setting up a maximum number of three different users allows unparalleled security against theft (the tracker will not work at all if stolen), ensuring highest confidentiality of use at the same time
12. programmable battery-saving mode
13. user-selectable multiple GPS data coordinates format (allows PC-based or cellphone-based tracking)
14. *"easy tracking" feature for cellphones*: use an html-compatible browser on your PDA or cellphone to track the device and you will be able to immediately display tracker position on Google Maps by simply clicking on one SMS link (wireless cellphone Internet connection and browsing required)
15. GPS navigator compatibility: each and every GPS navigator (PNA) with coordinate search feature can be used along with the SPECTRA T68 tracker
16. GPRS-based tracking available.

Complete with rechargeable battery, LED control interface, SOS pushbutton, the SPECTRA T68 GPS tracker comes available in two different versions to suit virtually every needs for price and performance:

1. **basic**: includes everything needed to use and program the SPECTRA T68 tracker along with all the operating features described above plus a special weatherproof enclosure (pictured aside) allowing body-worn or pet-worn use of the product

The T68 SPECTRA basic version, along with IPX4 weatherproof enclosure is pictured aside

2. **extra:** extra version consists of the basic version plus a medium-sized dog/animal collar plus a special total watertight (IP67) enclosure for use on pets or humans for water activities or total water protection.

Measuring just 3.1"x2"x0.8"-7,8x5x2 cm and weighing 1.4oz-40gr, this tracker operates worldwide under any GSM (900/1800Mhz) or PCS (1900Mhz) cellphone network and offers

paramount security under SPECTRADOME's brand reliability!
