T88 SPECTRA

The most powerful, complete, versatile and easy to use GPS tracker for car or personal use: real cutting-edge equipment 100% SPECTRADOME-branded!

The T88 SPECTRA advanced GPS tracking device is probably the only tracker in our wide selection to perfectly represent the words "highest quality and value for the money".

This incredible GPS/GSM-PCS/GPRS tracking device is actually suitable for a number of different tasks as follows:

- large and medium size pet and animal tracking ("extra" version only)
- children and elder people tracking and monitoring
- personal tracking device for disabled people
- GPS tracking and monitoring for outdoor/sports/leisure activities
- GPS tracking and monitoring for water sports and activities ("extra" version only)
- truck/car/bike/scooter tracking device
- truck/car/bike/scooter satellite alarm.

Thanks to the incredible number of innovative features, along with the opportunity to choose from three different versions available, the SPECTRA T88 GPS tracker is definitely your best possible buy for a GPS tracking device, coming available at a ridiculous price.

Featuring full SMS remote-controlled operation and programming, fast and easy-to-use PC configuration software, clear and intuitive configuration menu and SMS commands, the daily use of a SPECTRA T88 GPS tracking device will certainly turn out to be an extremely pleasant and enjoyable experience.

Please check out the incredible number of *truly innovative* features this little wonder makes available to you (to allow a clearer comparison, we have highlighted all of the most relevant innovations of our product in comparison to the current standard of other tracking devices currently available on the market):

1. extremely user-friendly and intuitive use, no need for complicated operation or specific knowledge to use the device
2. emergency cellphone feature: just a few fast and easy modification to device configuration will allow the user of the SPECTRA T88 GPS tracker to receive telephone calls from any touchtone phone (either landline or cellular) in the world. By pressing a button the SPECTRA T88 user will be able to answer the call and talk to the caller like they were on a regular phone
3. *remotely-deployable surreptitious room audio listening* (GSM infinity audio monitor feature)
4. double configuration mode (SMS commands or PC configuration software) available
5. multiple user tracking feature
6. 100% Google Earth/Maps tracking compatibility
7. *super-savvy tracking mode*: by enabling a dedicated configuration switch, SMS polling will be possible by simply ringing the GPS tracker SIM card phone number (requires active caller ID service from cellphone carriers)
8. SOS tracking features with dedicated pushbutton for activation and SOS warning message with GPS coordinates + *enhanced SOS mode* with automatic outgoing call placed immediately after the sending of SOS coordinates
9. easy to set and *remote-controlled geofence alarm feature*
10. speed alarm feature
11. *anti-GPS jamming alarm feature*: this is one of the most remarkable features when the SPECTRA T88 tracker is used as a vehicle tracking device or satellite car alarm. As soon as the GPS signal is lost or jammed, a special alarm will be sent out to pre-defined phone numbers along with the latest available GPS position detected
12. programmable continuous GPS tracking
13. highest *security against theft and unauthorized use*: the opportunity of inserting a six-figure password and setting up a maximum number of three different users allows unparalleled security against theft (the tracker will not work at all if stolen), ensuring highest confidentiality of use at the same time
14. programmable battery-saving mode
15. user-selectable multiple GPS data coordinates format (allows PC-based or cellphone-based tracking)
16. *"easy tracking" feature for cellphones*: use an html-compatible browser on your PDA or cellphone to track the device and you will be able to immediately display tracker position on Google Maps by simply clicking on one SMS link (wireless cellphone Internet connection and browsing required)
17. GPS navigator compatibility: each and every GPS navigator (PNA) with coordinate search feature can be used along with the SPECTRA T88 tracker
18. GPRS-based tracking available
19. powerful anti-rape alarm feature available: just press the "CALL" button for at least 5

seconds and the SPECTRA T88 will send out to a maximum of three pre-defined numbers one SMS complete with position coordinates and call/rape alarm. After sending position coordinates, the SPECTRA T88 will immediately place an outgoing telephone call for help that will allow T88 user to talk with rescuers or the rescuers to listen in to what is going on in the close vicinity

20. works with any BL5C-type battery for NOKIA cellphones! Yes, this incredible feature allows our customer to save DOUBLE on their purchase: absolutely no need to return the tracker for replacing a totally exhausted battery as you will be able to buy a new one from a local cellphone store near you. Also, this feature makes battery replacement as easy as pie!
21. *micro cellphone feature* for both SOS and rape alarms: talk and listen to your rescuers whenever an SOS or rape alarm call is active
22. *stylish white chassis* is optionally available: if you want to make hi-tech and fashion come together as one, this option has got the hot for you! A very trendy white chassis (pictured aside) is available for your SPECTRA T88 tracker as an option.

Complete with rechargeable battery, LED control interface, CALL and SOS pushbuttons, the SPECTRA T88 GPS tracker comes available in three different versions to suit virtually every needs for price, performance and aesthetics:

1. **basic**: includes everything needed to use and program the SPECTRA T88 tracker along with all the operating features described above
2. **extra**: extra version (shown in the aside picture) consists of the basic version plus a special total watertight (IP67) enclosure for use on pets or humans for water activities or total water protection
3. **fashion**: this is just the basic version coming in a full white livery (shown in the picture below on your right). This version was specifically conceived for the fashion people who do not disagree to wear a little hi-tech as well.

Measuring just 3.4"x1.7"x0.8"-8,5x4,3x2,1 cm and weighing 3oz-85gr, this tracker can be operated worldwide under any GSM (900/1800Mhz) or PCS (1900Mhz) cellphone network and offers

paramount security under SPECTRADOME's brand reliability!
